

Outputs for 'proj_test.py' model:

Training Accuracy and Error:

```
Data has converged at the 19400th run.  
Neural network is done training! Hit enter to validation processing.  
Accuracy on the training set: 0.97994  
Error percentage on the training set: 0.02006
```

Validation Accuracy and Error:

```
Data has converged at the 200th run.  
Neural network is done validating! Hit enter to test it.  
Accuracy on the validation set: 0.9953846153846154  
Error percentage on the validation set: 0.004615384615384616  
█
```

Test Accuracy and Error:

```
Testing done! Check out the generated output files ('testing_err.txt' and 'training_err.txt')  
Accuracy on the testing set: 0.9895384615384616  
Error percentage on the testing set: 0.010461538461538461
```
